Work Experience

Vision Intelligence Lab./LG Electronics | *AI Researcher* — Mar. 2024 – Present

- With project leader, *Ph. D. Jaechul Kim*, our team developed Vision Foundation Model (VFM), which can simultaneously do Object Detection, Panoptic Segmentation, Human Pose Estimation, and Depth Estimation with world-best performance. For the advanced driver assistance system (ADAS), we designed a lightweight VFM for On-device, and it is introduced in CES 2025.
- In addition, our team is now developing diffusion model-based Face Recognition (FR) model with 42M-scale generative training dataset for reliable FR in indoor/outdoor scenes.

Education

Sogang University — Feb. 2024
M.S., Electronic Engineering – Advisor: Prof. Suk-Ju Kang
