Research Interest

My research focuses on enabling robots to perceive, reason, and act in human-centered environments. In particular, I study egocentric vision and hand-object interactions in 3D space to build perception systems that can bridge human understanding and robotic manipulation. By developing generative and learning-based models, I aim to provide robots with the ability to anticipate human actions and collaborate seamlessly in daily environments.

Employment

AI Lab, LG Electronics, South Korea Mar. 2024 – Present
AI Researcher – Director: Ph. D. Jaechul Kim

Education

Sogang University, South Korea Feb. 2024
M.S., Electronic Engineering – Advisor: Prof. Suk-Ju Kang

- Thesis: 3D Hand Dataset Generation Framework with Pose-guided Text-to-Image Diffusion Model

Sogang University, South Korea Feb. 2022
B.S., Mathematics and Electronic Engineering (Double Major)

Research Experience

VGG, University of Oxford, United Kingdom & KAIST, South Korea | *Collaboration* Oct. 2024 – Present

- Collaborated with *Ph. D. Taein Kwon* to develop a novel framework leveraging rich exocentric observations to translate views
- Co-authored 2 papers – 1 NeurIPS 2025 (under review), 1 ICCV 2025 Workshop

AI Lab, LG Electronics, South Korea | *AI Researcher* Mar. 2024 – Present

- Led by *Ph. D. Jaechul Kim*, developing **Vision Foundation Model (VFM)** which can simultaneously do **Object Detection, Panoptic Segmentation, Depth Estimation, Pose Estimation, Face Recognition, and Person Re-Identification** with world-best performance for **On-Device** – introduced in **CES 2025**.
- Constructing diffusion model-based **Large-Scale Generative Datasets** for robust recognition in in-the-wild scenes
- Co-authored 1 paper – 1 AAAI 2026 (under review)

Pusan National University, South Korea | *Collaboration* Jul. 2023 – Feb. 2025

- Collaborated with *Prof. Kyeongbo Kong* to develop generative models (e.g. Diffusion Models and Large Language Models) for in-the-wild 3D hand and room reconstruction
- Co-authored 4 papers – 1 ECCV 2024 Oral, 1 ECCV 2024 Workshop, 1 ICCV 2023 Workshop, 1 IEEE TMM

Samsung Electronics, South Korea | *Collaboration* Mar. 2023 – Feb. 2024

- Collaborated with *Computational Science & Engineering Team* to develop a full pipeline that removes noisy variant and regresses structural lengths from SEM images
- Co-authored 1 paper – 1 IEEE TIM

Korea Electronics Technology Institute (KETI), South Korea | *Collaboration* Mar. 2022 – Feb. 2023

- Collaborated with *Data Fusion Platform Research Center* to develop to develop a calibration-free algorithm suitable for public spaces, enabling use by general users
- Co-authored 1 paper – 1 IEEE Access

Sogang University, South Korea | *Master Student* Mar. 2022 – Feb. 2024

- Advised by *Prof. Suk-Ju Kang*, working on **Diffusion Models, Large Language Models, Egocentric Vision, Hand-Object Interaction, Pose/Gaze Estimation, Image Restoration, and Machine Learning**
- Co-authored 9 papers – 1 WACV 2026 (under review), 1 ICCV 2025 Workshop, 1 ECCV 2024 Oral, 2 ECCV Workshop, 1 ICCV 2023 Workshop, 1 IEEE TMM, 1 IEEE TIM, 1 IEEE Access

Research Experience (continued)

Sogang University, South Korea | *Undergraduate Student* Jul. 2021 – Dec. 2021

- Advised by *Prof. Myoung-Wan Koo*, awarded 1st place in AI Grand Challenge [Press]

Academic Services

Conference Reviewer	ICCV (2025–), WACV (2026–)
Journal Reviewer	IEEE TII (2024–), TCSVT (2025–)

Skills

Languages	Strong reading, writing and speaking competencies for English and Korean
ML Frameworks	PyTorch, Huggingface, PyTorch Lightning, Tensorflow
Data Analytics	Numpy, Matplotlib, SciPy, Pandas, Seaborn
SW Engineering Tools	Python, Git-based workflow, CUDA, Shell, Linux, Docker, Slurm
